Preface

This volume is a collection of papers presented at the symposium on mathematical economics sponsored by the Research Institute for Mathematical Sciences, Kyoto University, which was held during February 11~13, 2005.

On behalf of the programme committee, I would like to extend my cordial thanks to all the participants of the symposium for their sincere and constructive contributions to our project.

We can safely say that mathematical reasonings have been playing a much more indispensable roles in economic theory than in any other discipline of social sciences. There seems to be several reasons which have endowed economic theory with peculiar mathematical characters.

First of all, many economic phenomena permit expressions in terms of quantitative languages.

We have also to take account of the fact that an economy consists of a huge number of sectors which are entangled in a complex manner. Economic phenomena result from the interactions of these interdependent component sectors. Their mutual relation is so complicated that an ordinary language and a casual way of thinking have only very limited abilities to describe and analyze economic phenomena. It is quite easy for anyone to imagine serious confusions which would result if we had recourse exclusively to ordinary languages and casual reasonings. Although mathematical reasonings may sometimes seem too round-about for our purposes, it certainly provides economists with simple and efficient analytical weapons.

Furthermore economists have been suffering from the difficulty of controlled experiments in their researches. That is exactly why much importance has been attached to rigorous speculative experiments in economic theory. So called "axiomatic method" developed in Vienna during the inter-war period should be regarded as being promoted by the same view and recognition under the influence of D. Hilbert.

I would be pleased very much if our symposium could contribute to widening and deepening of the mathematical foundations in economic theory.

目 次 (*speaker)

I. Analytical Foundations of Economic Theory		
1. WEAK AND STRONG CONVERGENCE THEOREMS FOR NONLINEAR OPERATORS AND THEIR APPLICATIONS -----		1
東工大・情報理工学	高橋 渉 (Wataru Takahashi)	
2. Generalized Dual System Structure and Fixed Point Theorems for Multi-valued Mappings -----		15
阪大・経済学	浦井 憲 (Ken Urai)	
〃	横田 耕祐 (Kousuke Yokota) *	
3. Cross-Dual on The Golden Optimum Solutions -----		27
九大・経済学	岩本 誠一 (Seiichi Iwamoto)	
II. Aspects of Equilibrium Theory		
4. Rational Expectations and the Modigliani-Miller Theorem -----		44
一橋大・経済学	武隈 慎一 (Shin-Ichi Takekuma)	
5. General Equilibrium Theory for Economy with Asymmetric Information: Basic Model -----		54
阪大・経済学	浦井 憲 (Ken Urai)	
〃	吉町 昭彦 (Akihiko Yoshimachi) *	
6. A Summary on "Collusion, Fluctuating Demand, and Price Rigidity" -----		60
京大・経済研	花菌 誠 (Makoto Hanazono) *	
Ohio State Univ.	Huanxing Yang	
III. Dynamic Macro-economic Theory		
7. R&D Subsidy and Indeterminacy -----		65
神戸大・経済学	春山 鉄源 (Tetsugen Haruyama)	
8. A short-run and long-run analysis of a quasi-stochastic monetary economy -----		81
神戸大・経済学	中村 保 (Tamotsu Nakamura)	
9. Unstable Periodic Orbits and Chaotic Transitions in a Macro-Economic Model -----		95
	石山 健一 (Ken-ichi Ishiyama) *	
東大・数理科学	斉木 吉隆 (Yoshitaka Saiki)	

1 0.	On Convergence of Sum of White noises to Periodic Stochastic Process -----	103
	慶應大・経済学 加藤 寛之 (Hiroyuki Kato)	
IV. Mathematical Finance		
1 1.	Pricing Lookback Options with Knock-out Boundaries -----	121
	日本銀行 室井 芳史 (Yoshifumi Muroi)	
1 2.	The Consistency in Interest Rate Models / Extending the support theorem and the viability theorem -----	127
	(株)三菱証券 中山 季之 (Toshiyuki Nakayama)	
1 3.	Mean-variance hedging for discontinuous processes — a survey and examples -----	129
	慶應大・経済学 新井 拓児 (Takuji Arai)	
1 4.	ON THE VERIFICATION THEOREM OF CONTINUOUS-TIME OPTIMAL PORTFOLIO PROBLEMS WITH STOCHASTIC MARKET PRICE OF RISK -----	144
	一橋大・国際企業戦略 本多 俊毅 (Toshiki Honda)	
	〃 上村 昌司 (Shoji Kamimura) *	
V. Game Theory		
1 5.	A Note on Twisted Dual Games -----	151
	兵庫県立大・経営学 菊田 健作 (Kensaku Kikuta)	
1 6.	On the Computation of Cores of Games with Punishment-Dominance Relations -----	159
	慶應大・経済学 増澤 拓也 (Takuya Masuzwa)	
1 7.	A Question on the Usefulness of Copyright Protection -----	164
	慶應大・経済学 細矢 祐誉 (Yuhki Hosoya)	
VI. Environmental Problem		
1 8.	The Effects of Learning on the Existence of Stable International Environmental Agreements -----	171
	九大・経済学 藤田 敏之 (Toshiyuki Fujita)
